

## Petition to start a land use ordinance

The below signatures represent Montgomery County citizens who have concerns with our current WECS ordinance. Our petition is to start a reasonable and responsible land use ordinance, so that our current WECS ordinance, addresses our communities concerns and adverse affects that pertain to wind farms.

Moving forward we would like to have a comprehensive plan and land use ordinance agreement that addresses these concerns, for those whom are affected by the current WECS ordinance. This petition also includes the support of our county commissioner John Frey, and the "assurance" that we will have participation and his support in the process. This process will include a reasonable and responsible WECS ordinance, is put in place, for any new and current, wind farm land use ordinances.

## Petition to start a land use ordinance

The below signatures represent Montgomery County citizens who have concerns about our current Wind Energy conversion Systems (WECS) ordinance. Our petition is to start a reasonable and responsible Planning and zoning ordinance, that will address our community's concerns about adverse affects of wind farms.
